ULTRA

Electric Dryer for Curing Water-Based and Plastisol

Unprecedented Control

- Intuitive touchscreen controls give you quick and easy access to all dryer settings
- Chart dryer temperature and energy consumption in real time
- Save and recall parameters for fast setups

Cure All Ink Types Efficiently

- Air circulation cures water-based inks quickly and thoroughly
- Adjust belt speed to ink manufacturer's recommended cure time

Available in four different configurations

- Models available from 36" belt width/6' heat chamber up to 60" belt width/10' heat chamber

Design and Construction

- Double wall construction with galvanized interior
- Heavy-duty multiple section construction
- Air cooled case keeps heat in and ensures the dryer stays cool to the touch
- High efficiency thermal insulation keeps heat from migrating into the workplace

Conveyor System

- Industrial-grade AC motor
- Heavy-duty conveyor rollers
- Teflon-coated fiberglass belt for maximum durability

Options

- Custom dryer sizes available
- Infeed/outfeed extensions per customer requirements
- Outfeed cooling fan to boost ink cooling when substrate exits the heat chamber

Heat Chamber

- 5" blower exchanges air in the chamber over 12 times per minute to cure water-based inks quickly and efficiently
- Long-lasting ceramic heating elements ensure even distribution of heat throughout the chamber
- Overheating alarm warns you when dryer exceeds the temperature set by the user
- Adjustable infeed/outfeed openings to accommodate a wide variety of substrates

Control Center

- 7" touchscreen control panel
- Temperature control with accuracy of +/- 1°F
- Set desired cure time and the dryer will automatically determine the proper belt speed
- Save and recall up to 16 jobs for fast setups
- Work Schedule mode allows you to program automatic startup and cool down based on the day of the week
- View temperature and energy consumption plots in real time
